

TST - Terme di Salsomaggiore e di Tabiano Srl has been operational since April 2015. Made up of a pool of private entrepreneurs from Emilia and Milan, in April 2015 it has leased the management of the **two Thermal Spas of Salsomaggiore and Tabiano**, Zoja and Respighi, of the **Villa Igea Thermal Rehabilitation Clinic** and of the **Dermocosmetological Products** and thermal water sector of the Salsomaggiore and Tabiano SPA. The rent was then transformed into the **direct acquisition** of the 4 company branches which took place in December 2018.

The challenge of the new management is **to relaunch a thermal compendium** which boasts **two thermal waters** of unquestionable effectiveness and which enjoys an excellent reputation on a national level, but which in recent years has been going through a serious company and product crisis with which the public administration was no longer able to cope.

4 the principal units of Thermae of Salsomaggiore and Tabiano: the **Zoja** thermal establishment in Salsomaggiore; the **Respighi** thermal establishment in Tabiano; the **Villa Igea** rehabilitative thermal clinic in Salsomaggiore; the line and trade mark of Salsomaggiore and Tabiano **Thermal Products**.

Thermae of Salsomaggiore - Zoja Thermal Establishment

Always renowned for their anti-inflammatory, rehabilitative and regenerative properties, Salsomaggiore's **thermal waters** are divided into four different types: natural salsoiodic, iron free, **Acqua Madre** and decalcified Acqua Madre. This variety allows the creation of **personalized therapeutic and wellness programmes**: hot muds and treatments to combat arthorheumatic, circulatory and gynecological pathologies, inhalations to resolve respiratory problems, oral balneotherapy for oral health, baths for physical rehabilitation and motorial reactivation.

Thermae of Tabiano - Respighi Thermal Establishment

Recognized among the best in Europe for its sulphurous waters, the Thermae of Tabiano, spa for breath, boasts a proven effectiveness in the prevention and treatment of respiratory disorders and diseases of **bronchi, ear, nose, throat and skin** in adults and children. The health cycles are monitored by a first class medical team that operates in the following areas: bronchopneumology, otorhinolaryngology, rehabilitative respiratory, pediatric, dermocosmetological and hydrokinesitherapy rehabilitation.

Villa Igea - Thermal Rehabilitation Clinic

This is an integral part of the thermal offer of the Thermae of Salsomaggiore and Tabiano, with **60 beds** and is a centre for **physical and rehabilitative therapy** with a team of medical specialists and consultants in the fields of physiatry, rheumatology, neurology, orthopedics, sport traumatology, pain therapy and internal medicine. It is proposed as a regional and national reference centre for orthopedic and neurological rehabilitation and is **accredited with the National Health Service**.

Thermal Products and CE Medical Devices

The thermal products consist of **two dermocosmetological lines** with 69 items; a line of CE medical devices with 10 items and some Private Label products. The Thermae of **Salsomaggiore dermocosmetic line with 32 items**, the **Thermae of Tabiano dermocosmetic line with 37 items** and the CE Medical Devices are distributed in the pharmacy channel through a dealer and are sold directly in the spas and via e-commerce. They are quality products that support the repetition of the thermal experience at home.
